

3rd International Hybrid Power Systems Workshop

Tenerife/Spain, 8 - 9 May 2018

BE A SPEAKER OR SPONSOR!

Energynautics from Germany in partnership with the Utility Variable-Generation Integration Group (UVIG) from the USA is pleased to announce the **3rd International Hybrid Power Systems Workshop** to be held in Tenerife/Spain, 8 - 9 May 2018.

This event will focus on the **deployment of wind, solar, battery and diesel technologies on isolated and islanded power systems and micro-grids**, discuss what has worked (and what has not), and provide insight into needed areas of improvement.

The workshop is a unique forum for:

- technology vendors of distributed variable generation & storage technology
- project developers and consultants
- regulators
- system planners and designers
- operators of small systems

... to gain exposure to the latest thinking on the design and operation of hybrid power systems. It will look at applications in a variety of locations and operating environments, with a focus on system design, operating experience, business models, economics, and implementation issues.

Workshop Topics

- Resource Assessment and Forecasting
- Managing Variability and Uncertainty
- Intelligent Control and Grid Stabilization
- System Design Options
- Hybrid System Technologies
- Remote Mining Application
- Health/Quality of Life Impacts
- Economic Development
