

4th International Hybrid Power Systems Workshop

22 - 23 May 2019, Crete/Greece 

CALL FOR PAPERS – Be a Speaker!

The workshop will focus on the challenges that arise when **high shares of renewables** (wind, solar, hydro) are integrated into **island power systems/micro-grids**, in combination with conventional power generators and optionally batteries/flywheels.

Members of our international **Advisory Committee** come from institutions such as IRENA, SEV, Vestas, Vattenfall, NREL, ABB, ERCOT, DTU, GE Power, WindEurope, ENERCON, Regional Energy Agency of Crete, Hydro Québec, University Carlos III Madrid, ESIG, Stedin, HTW Berlin or HOMER Energy.

The workshop is a unique forum for:

- System planners and designers
- Operators of small systems
- Project developers and consultants
- Universities and research institutes
- Regulators and NGOs
- Technology vendors of distributed variable generation & storage technology

The primary objective is to stimulate **interdisciplinary thinking between industry and research** by providing a platform for discussion and for sharing ideas, practical experiences and knowledge regarding the key issues in the relevant fields.

Workshop Topics

- Power Systems Design Options
- Hybrid System Technologies
- Project Experience and Case Studies
- Storage Design and Sizing
- System Modelling and Simulation
- Remote Mining and Tourist Applications
- Intelligent Control and Grid Stabilization
- Resource Assessment and Forecasting
- Managing Variability and Uncertainty
- Regulatory Challenges related to Hybrid Power Systems
- Pico-/Mini-/Micro-Grid Systems Design
- Economic Evaluation of Hybrid Systems
- Load Assessment Strategies
- Protection Issues in Hybrid Systems
- Design of Energy Management Systems
- Standards and relevant Grid Codes
- Ancillary Services in Hybrid Systems

Abstract Submission: **Extended Deadline!**

To present a paper at the workshop, upload an abstract of maximum 3,000 characters (free style) until **29 January 2019** to our Online Submission Platform.
