

10th INTERNATIONAL HYBRID POWER PLANTS & SYSTEMS

WORKSHOP

organized by energynautics

05-06 MAY '26
SARDINIA, ITALY

CALL FOR PAPERS – Be a Speaker!

We are looking forward to discussing the challenges of Hybrid Power Plants, Hybrid Power Systems, Micro-Grids, Isolated/Islanded Power Systems and inspiring ideas for the way that lies ahead.

In the heart of the Mediterranean, the autonomous Italian region of Sardinia is at the forefront of renewable development and decarbonization, accompanying a profound transformation of its energy infrastructure. Its geographical position and climatic conditions provide an optimal environment for experimenting with energy storage and new technologies.

Papers will be published on the IET Digital Library and IEEE Xplore

The papers chosen for presentation at the Hybrid Power Plants & Systems Workshop will be published on the IET Digital Library and IEEE Xplore and submitted for indexing in IET Inspec, Ei Compendex and Scopus.

► WORKSHOP TOPICS

The focus of the International Hybrid Power Plants & Systems Workshop is on the two topics of Hybrid Power Systems and Hybrid Power Plants as they complement each other well. Similar issues are addressed, especially in the area of control systems, which leads to synergy effects for the workshop participants.

Regulatory Challenges
Managing Variability and Uncertainty
Pico-/Mini-/Micro-Grid Systems Design
Design of Energy Management Systems
Standards and relevant Grid Codes
Technologies and Design
Hybrid Power Systems
Economic Evaluation
Project Experience and Case Studies
Ancillary Services
System Modelling and Simulation
AI (Artificial Intelligence) and Hybrid Power Systems
Intelligent Control and Grid Stabilization
Load Assessment Strategies
Protection Issues

Standards and relevant Grid Codes
Storage Design and Sizing
Ancillary Services
Project Experience and Case Studies
Hydrogen
Hybrid Power Plants
Metering and Park Control Concepts
Economic Evaluation
Technologies and Design
System Modelling and Simulation
Managing Variability and Uncertainty
Resource Assessment and Forecasting
Regulatory Challenges
AI (Artificial Intelligence) and Hybrid Power Plants

► **THE WORKSHOP IS A UNIQUE FORUM FOR:**

- » System Planners and Designers
- » Operators of small systems
- » Project Developers and Consultants
- » Universities and Research Institutes
- » Regulators and NGOs
- » Vendors of distributed variable generation & storage technology

The primary objective is to stimulate interdisciplinary thinking between industry and research by providing a platform for discussion and for sharing ideas, practical experiences and knowledge regarding the key issues in the relevant fields.

► **ABSTRACT SUBMISSION**

To submit a paper, upload an abstract of maximum 3,000 characters (free style) to our Online Submission Platform till **18 January 2026**.

For details visit our website:
hybridpowersystems.org

► UPDATES VIA E-MAIL

Don't miss any deadlines or updates on the Workshop!
Stay tuned & subscribe for updates via e-mail.

tiny.cc/hybrid-nl

We will provide information on:

- » Call for papers, incl. topics & deadlines
- » Detailed program, incl. agenda, sessions & presentations
- » Fees & registration, incl. special discounts
- » Accompanying events, incl. dinner, tutorials & study trip

► ORGANIZER

energynautics
solutions for sustainable development

Energynautics GmbH
Robert-Bosch-Str. 7
64293 Darmstadt, Germany
